

Bench Joiner Wanted:

Due to the national and international success of its Joinery Management Software (JMS), Joinerysoft Ltd is expanding its customer support team. Joinerysoft is a leading supplier of software to the bespoke timber joinery market. Based in the UK we provide support to over 800 joinery manufacturers who use our software throughout the world.

We are looking for someone to join our customer support team to provide remote and onsite technical support to our software customers. The role will include installation, set up and training for new and existing Joinerysoft customers.

Designed to be easy to use our software is based upon joinery terminology and we therefore need an experienced bench joiner rather than a computer expert to join our team.

The ideal candidate should have/be:

- Experience within the joinery industry, perhaps as a time served joiner or estimator or previous joinery background.
- Computer literate
- Good communication skills
- Software experience (not essential)
- CNC machine experience (not essential)

Experience with software and CNC machines would be useful, but is not essential as we will provide you with all the training you need. If you would like a change and want to use your bench joinery experience in a new way speak to us.

This vacancy is based at our new flagship premises at Chippenham, Wiltshire but will involve some travelling with advance notice, sometimes with 1-2 nights away.

We offer flexible working and a pension scheme. Good salary and benefits will be offered to the successful candidate.

If you would like to join a professional, friendly and expanding company call us on 01608 643302 or send your C.V. to recruitment@joinerysoft.com
