

Joinerysoft Expand JMS Modules for Bespoke Joinery

Joinerysoft will be demonstrating its joinery software, **JMS at Stand L18, Hall 17** at the W6 Working with Wood Exhibition. As well as demonstrating our established modules for Casement Windows (flush and storm), Sliding Sash (sprung or weighted), Doors and Doorframes, Joinerysoft will also be demonstrating new release Screens and BOM (Bill of Materials). JMS offers a comprehensive package for joiners that can be purchased together or individually in

modules. Further plans for JMS-Stairs and JMS-CNC will also be revealed with features and

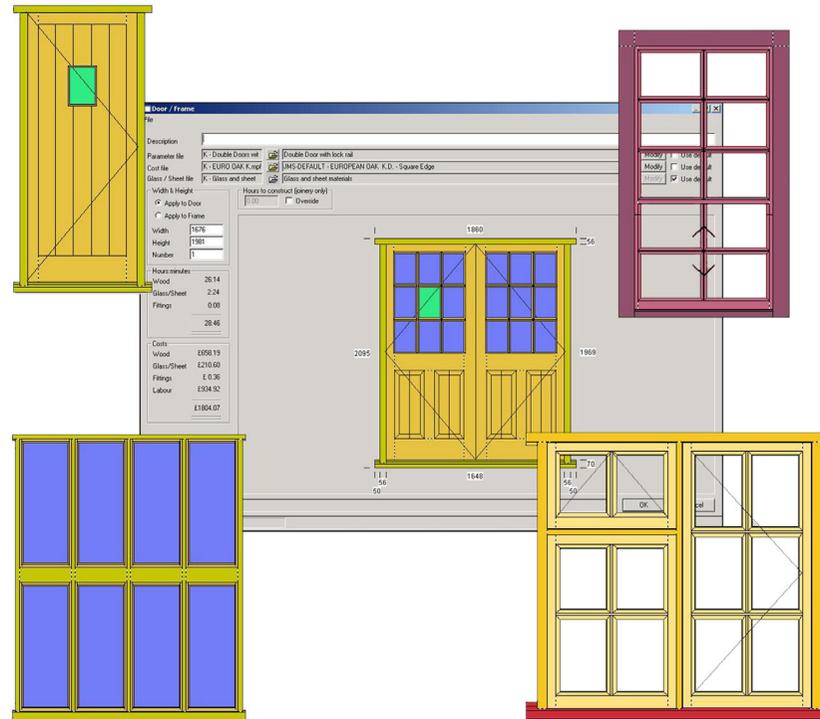

benefits demonstrated.

Designed for joiners creating bespoke

joinery, it easily creates estimates/quotations, cutting lists, wood and glass reports

and invoices. It is easy to use, saves time and provides accurate information for producing every type of window / door. It takes the admin out of bespoke joinery allowing you to do what you do best – joinery!

After a successful launch at Woodmex 2004, JMS has been discovered by joiners all over the world. From Cornwall to Glasgow, Pembrokeshire to Kent, Ireland to Australia, our customers consistently tell us

AS SHOWN IN INDUSTRIAL WOODWORKER – OCTOBER 2006

Joinerysoft Expand JMS Modules for Bespoke Joinery

that JMS helps to improve their business', reducing costs and saving time on estimates and producing cutting lists.

Customer indecision need not be a headache with estimates/quotes easy to adapt at a touch of a button. Disputes can be a thing of the past, with clear estimates, illustrated drawings and itemised costs. Come and see for yourself, what makes our customers so keen to recommend JMS.

Individual demonstrations will

be run continuously throughout the show, and group demonstrations will take place every hour on the ½ hour. A separate demonstration area for existing customers will highlight new enhancements, allowing existing customers to update their knowledge and brush up their skills.
