

World record for Joinerysoft

Flying the Joinerysoft Hot Air Balloon at the Lorraine Mondial International Hot Air Balloon Fiesta in Metz, France during July, Joinerysoft Managing Director and Pilot, Alan Turner took part in the successful launch of 343 hot air balloons to create a new World Record. The Joinerysoft Hot Air Balloon turns heads where ever it flies and Metz, France was no exception. During the 10

day event of the Lorraine Mondial International Hot Air Balloon Fiesta, the Joinerysoft hot air balloon fly no less than 15 times, with Pilot and crew enjoying the relaxed style of flying in the French landscape, and excellent French hospitality. Purchased as an advertising tool to promote Joinerysoft's presence at the W6 Woodworking show,

during October 2006, the Joinerysoft balloon has flown in France three times, as well as travelling throughout the UK, including Yorkshire, The Lake District, Somerset and Oxfordshire.

Joinerysoft are equally delighted to celebrate with Woodworking News their successful record in reaching 25 years of service to the Woodworking Industry. No mean feat with the

challenges that have faced the woodworking industry. Alan Turner says, "Woodworking News' achievement provides an inspiration for all of us. We wish them success for the next 25 years."
